Iizuka discloses a swash plate compressor having a piston (13) and shoe (14) combination wherein a shoe pocket in the piston contacting the shoe has a constant curvature and a projecting part of the shoe contacting the shoe pocket has at least two different curvatures (Ra, Rb). Katsunori et al discloses a swash plate compressor having a piston (450) and shoe (422) combination wherein a shoe pocket in the

piston contacting the shoe has a constant curvature and a beveled portion (452b). The unobvious improvement includes a piston and shoe combination wherein a shoe pocket in the piston contacting the shoe has a constant curvature and a beveled portion, a projecting part of the shoe contacting the shoe pocket has at least two different curvatures, and a tangent point of the beveled portion and the constant curvature portion of the shoe pocket being set within a contact area between the projecting portion and shoe pocket.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
